

I Believe
in Beebe

CREATING THE NEXT
GENERATION
of CARE

A Comprehensive Campaign

For over 100 years Beebe Healthcare has served the Delaware Beach community and surrounding areas of Sussex County. Beebe's caring hands have been here year after year providing quality and compassionate care. As our community has grown, Beebe has also grown from a small family hospital into a large, state-of-the-art healthcare system.

Sussex County is one of the fastest growing counties in the nation. People moving to the Delaware Beaches require more than new homes, they also want great healthcare. Our community continues to need advanced cardiac procedures, non-invasive vascular care, and cutting edge cancer treatment – here at home, close to family and friends, and most importantly, cared for by our outstanding doctors and nurses.

Our goal is to make Sussex County one of the healthiest counties in the nation.

Creating the Next Generation of Care

The call from the community is clear, to provide more state-of-the-art healthcare and programs for all ages and walks of life—for everyone who lives, works, and vacations in Sussex County. To meet these needs, Beebe is embarking on an ambitious, \$200 million dollar plan to expand its facilities as well as continue to recruit and retain its award-winning team of healthcare professionals.

Community support is needed.
Please support your local, not-for-profit community
healthcare system - the best in Sussex County.

What's Inside

Inside you will find information on Beebe Healthcare's plans to expand facilities and improve healthcare with:

[South Coastal Campus: Emergency Department](#)

[South Coastal Campus: Cancer Center](#)

[Rehoboth Campus: Specialty Surgical Hospital](#)

[Margaret H. Rollins Lewes Campus:
Center for Heart and Vascular Services](#)

You will also find information on how you can help through

South Coastal Campus

Emergency Department

Beebe's Millville Health Campus - Emergency Department and Cancer Center

An emergency situation, by definition, is unexpected and urgent. People having a sudden need for medical attention may have been involved in a recreational, workplace or highway accident. Beebe Healthcare's South Coastal Campus on Route 17 in Millville will provide care at a new freestanding Emergency Department (ED) as well as Level III trauma center.

This ED will be open year-round, 24 hours a day, 7 days a week. There will be 14 emergency bays, onsite imaging and laboratory, and a helipad. We expect to provide emergency care for approximately 15,000 people annually.

This ED will be in addition to the existing Walk-In clinic in Millville, which will remain open year around.

Cost & Timeline: South Coastal Campus

\$48 Million – Construction beginning November 2018 through June 2020

South Coastal Campus

Cancer Center

Beebe's Millville Health Campus - Emergency Department and Cancer Center

One moment you are engaged in your life and healthy; the next instant you receive a cancer diagnosis. In that instant you need expert, personalized care, close to home. Beebe Healthcare's South Coastal Campus on Route 17 in Millville will provide this care at our new, second Cancer Center.

From diagnosis through treatment and beyond, our physicians, nurses and staff listen, support and encourage. This new Cancer Center will offer all of the services currently available at the Tunnell Cancer Center in Rehoboth: medical oncology, chemotherapy and radiation oncology. Beebe Healthcare's cancer care teams are committed to providing every patient and their family extraordinary care with great compassion.

Cost & Timeline: South Coastal Campus

\$48 Million – Construction beginning November 2018 through June 2020

Rehoboth Campus

Specialty Surgical Hospital

I Believe
in Beebe

This new Specialty Surgical Hospital will be built at our current location on Route 24 behind Beebe's Tunnell Cancer Center with access from Warrington Road.

With a greater emphasis on outpatient care, Beebe Healthcare plans to enhance and expand access to advanced medical technologies and outpatient services with a Specialty Surgical Hospital on the Rehoboth Campus.

Outpatient and short stay surgeries offer many advantages over traditional inpatient surgery, without compromising quality of care.

Some benefits of outpatient and short stay surgery include: recovering in the privacy of your own home, generally lower costs and less stress than an extended inpatient stay.

This world-class, destination campus will have a dedicated floor for *Women's Health* and *Labor & Delivery* and will be the future home for Beebe's newly created *Center for Robotic Surgery*.

Cost & Timeline:

\$124 Million – Construction beginning April 2019 through December 2022

Margaret H. Rollins Lewes Campus

Center for Heart and Vascular Services

I Believe
in Beebe

"Our family is happy to have our gift support the renovation of the Lewes Campus. We welcome the opportunity to transform this historic campus."

Margaret (Peggy) H. Rollins

The Ma-Ran Foundation has generously made a historic \$10 million gift toward significant improvements on the Lewes Campus to better serve patients, visitors and care teams. Renovations to the Margaret H. Rollins Lewes Campus will include the refurbishment of current semiprivate patient rooms to private rooms and additional on-site parking. An improved main entrance and the creation of a new West Lobby will make navigation much easier for patients and visitors.

A new Hybrid Operating Room (OR) and a third Cardiac Catheterization/Electrophysiology (Cath/EP) Lab are under construction and expected to be patient ready in the Fall of 2019. A Hybrid OR provides vascular surgeons and patient care teams with the latest in advanced imaging technology. Patients will have access to less invasive procedures that are currently only available in a university hospital setting. Beebe Healthcare's Margaret H. Rollins Lewes Campus is home to our new state-of-the-art da Vinci Robotic Surgical System and the Center for Heart and Vascular Services.

Cost & Timeline:

Cath/EP Lab: \$6 Million – Construction beginning August 2018 through May 2019
Hybrid OR: \$11 Million – Construction beginning September 2018 through October 2019
MHR Lewes Campus: \$10 Million - Construction beginning January 2019 through 2022

Ways of Giving

Going Above and Beyond

Beebe Healthcare's real strength has always been our dedicated doctors, nurses, and other team members.

We want to ensure that the Next Generation of Care will always have the most talented caregivers and best programs.

Beebe is committed to keeping you healthy and will be there, by your side, when you are sick.

Endowments and Programs

While important parts of our plan are dedicated to ensuring the best facilities in the most convenient locations, it is also critical to continue to develop and endow unique and innovative wellness programs and services to help everyone who lives, works and visits Sussex County become healthier and stronger.
